CWWCA Annual Conference Jan. 6-8

PROGRAM
CWWCA Annual Conference January 6-8, 2011
Crowne Plaza, DIA, Denver, CO

Thursday, January 6
AM 9:00 10:00  Technical Working Group Meeting
10:00 11:00  CWWCA Board of Directors Working Session
11:00 12:30  Registration

PM 12:25 2:25  “Emergency Life Saving Techniques in the Field”
Eugene Wagner, Quality Irrigation  2 hrs*
2:25  Break
2:30 3:30  “Colorado Aquifers at a Glance”
Heather Justus, Leonard Rice Engineers, Inc.  1 hr*
3:35 4:30  “Drilling Fluids, Foams and Grouts Optimized for Colorado”
David Wilson, Baroid IDP  1 hr*
3:00 5:00  Family Event “Tomboy Tools Workshop”

Friday, January 7
AM 7:00 8:00  Past Presidents Breakfast, Atrium Cafe
7:00 8:00  Continental Breakfast
8:00 9:50  2011 NGWREF McEllhiney Lecture ‘The Nebraska Grout Task Research: Unexpected Results-New Solutions’ Tom  1 hr*
9:50 10:00  Break
10:00 12:00  CWWCA Membership Meeting
Noon 1:00  Lunch and Installation of Officers and Awards

PM 1:00 6:00  Supplier/Manufactures Exhibits  1 hr*
3:00  Suppliers Meeting Atrium Cafe
4:00  Cocktails (Cash Bar) Exhibit Area
5:00 6:00  Light Supper Buffet and Scholarship Auction, Exhibit Area
6:00 9:00  Casino Night

Saturday, January 8
AM 7:00 8:00  Continental Breakfast
8:00 8:55  “Medical Marijuana; A Budding Problem in the Workforce”
Michael Anton, Pinnacol Assurance  1 hr*
9:00 9:55  “Protecting Assets From Lightning Damage”
Charlie Whiteside, American Conservation & Billing Solutions.  1 hr*
9:55 10:00  Break
10:05 11:00  “The Selection & Application of Large HP “VFD’s”
Bob Pritchard, Servtech, Inc.  1 hr*
11:30 2:00  CWWCA Board of Directors Meeting/Working Lunch
Note: * Indicates Approval for Continuing Education Credits
Website Advertising

Banner Advertising

Banner advertisements appear on the right of every page of the website. The advertisement rotates sequentially, so every ad will have equal display time. If the demand for banner advertisements warrants it, additional banners will be incorporated into the site.

One year banner advertisement: $300.00

If the advertiser is a CWWCA member, this fee also includes a free upgrade of your member directory listing.

Banner ads should be 150 pixels wide, and 150-300 pixels high. Ads must be submitted in .jpg format.

Member directory upgrade

CWWCA Members may choose to upgrade their listing in the searchable member's directory.

Upgrading allows your listing to be displayed at the top of searches and sorts. It allows your listing to link to your website. And upgrading allows you to display your logo or picture of your choice with your listing.

One year of Directory upgrade: $50.00

Pictures for the listing should be submitted in .jpg format and should be 80 pixels high, by 80-160 pixels wide.

DrillStem Advertising

Advertising Rates for the DrillStem, A Quarterly Publication of CWWCA (published in March, June, September, and December)

President’s Letter

Almost the end of 2010, and no good snow storms where I live yet! While winter weather can add a degree of difficulty to working outside, I’d still prefer to see the flakes fly (especially for Christmas). This also marks the end of a year for me as president. I’ve learned a lot and hope to continue to contribute to the CWWCA and our industry. As I’ve written before, you get out of something what you put into it, and I feel this has been a successful year. Our Board of directors and executive committee have worked well together during the time I’ve presided, and I thank everyone. Thanks for volunteering your time, energy and resources to help improve our industry and our organization.

A highlight of the year is the implementation of the CWWCA Apprenticeship program, spearheaded by Peter Berglund. A voluntary program administered by our staff, this will bridge the gap to help people prove their work experience and professionalism while pursuing a water well contractors license. There are already people registered as apprentices and we hope there will be more in the future as knowledge of this service becomes more widespread.

I encourage everyone to get involved with our association. Whether you agree or disagree with some of the positions that have been taken, your participation can guide future decisions and discussions and will make the CWWCA, and our industry in Colorado stronger and more professional. Ways you can help are as simple as attending membership meetings, volunteering to assist at conferences, participat-

Cancellation Policy: Full registration fees will be refunded prior to Dec. 20, 2010. A $50 fee will be charged for cancellations submitted between Dec. 21, 2010 & Dec. 31, 2010. No fees will be refunded after Jan. 1, 2011. All cancellation requests must be submitted in writing to the CWWCA office.

If you have a disability and may require special accommodations please notify us in writing at least (2) weeks prior to the conference.
Serving people is our mission. We make it our everyday practice to find out the needs of our clients and help in any way possible to further the cause of their company, provide the best coverage available, and bring an uncommon level of expertise and service to them.

Back to basics of workers’ comp

For many years, it's been a buyer's market: employers have saved on workers comp cost by relying on large dividends. Now however, the market has turned dramatically, and dividends have declined sharply. While you can't control the market you can control your premiums by minimizing your losses.

Get management behind it

The only way companies really control their workers’ comp costs is to convince all involved that controlling cost is worth the effort. Companies who have made the greatest strides do so because everyone is focused on the importance of safety. Your internal strategy—which centers on preventing claims—is much more important than shopping for a higher dividend.

Orient and train employees

This is a crucial step, especially now, in a tight employment market. How you train and encourage your new employees in safe working practices will determine your insurance costs in the near future. During orientation, you'll find that many employees resist asking questions. To counter this reluctance, you should use checklists and fill any gaps by explaining in detail what you expect of new employees. At the end of the training course, ask new employees to sign the checklist to confirm that they understand and have been instructed in the company's safety procedures. This signed checklist should become part of the employee's permanent record.

Put your policies into practice

If you don't have safety policies, then develop and use them. Most companies have written disciplinary procedures but rarely use them. Review your claim information: do the same people and injuries show up from year to year? If so, are your employees properly trained and do they understand disciplinary procedures?

Report claims immediately

Statistics reveal that for every week a claims goes unreported the cost increases dramatically, as much as 50%. When employees delay reporting an injury, find out why. Then turn to your policy statements and use the necessary disciplinary procedures on record. Your goal is to get employees to report injuries, not judge whether or not an injury is important enough to report.

Eager to get started? Give us a call today. We can start working on your policy anytime during the year. We look forward to working with you!
Technical Working Group Recap

By Dan Niemela

Next TWG Meeting:
January 6, 2010 (Morning, TBA)
CWWCA Annual Conference,
Crowne Plaza Hotel (DIA),
Denver, CO.

DWR Budget
The State continues to struggle
with current and projected budget
shortfalls. No DWR budget cuts nor
additional furlough days have been
proposed. The 2011 budget is due
in October, but will probably be
delayed until after the November
election. The Well Inspector Pro-
gram may be at risk of cuts in
2011.

Well Inspector Program
Background:
Currently, there are two well in-
spectors in the State and Nolan
Lloyd, Chief Well Inspector. The
well inspection program is cur-
rently underfunded and under-
staffed. Half of the inspection
program is funded by $40 from
each well permit fee and the
other half of the program is
funded by the general fund.
The Colorado Department of
Natural Resources has not ex-
pressed interest in supporting
an increase in well permit fees
for the well inspection program.
Scott Cuthbertson and Dick Wolfe
would reportedly publicly sup-
port a legislative proposal to in-
crease the well permit fee for the
well inspection program, but the
DWR will not independently pro-
pose such legislation.

By statute, the well inspector
program is entirely funded by
well permit fees. Currently, half
the inspection program is funded
by the State’s general fund. The
CWWCA discussed receiving assis-
tance from DWR staff to draft leg-
islation that would raise permit
fees to fully fund the well inspec-
tion program. The CWWCA could
work with a legislator to sponsor
this legislation in the 2011 legisla-
tive session.

Water Well Construction Rules
Update
The National Ground Water Asso-
ciation (NGWA) construction stan-
dards have not been finalized and
are undergoing committee review.
These standards were reported to
be significantly stricter than Colo-
rado’s Water Well Construction
Rules, but will not be mandatory.
Once final, the NGWA construction
standards may stimulate discussion
regarding revisions to Colorado’s
Water Well Construction Rules.

Geothermal
The NGWA has developed a certifi-
cation program for geothermal
contractors. In addition, the NGWA
has prepared position papers re-
garding geothermal wells.

Apprenticeship
The CWWCA BOE approved appren-
ticeship program was introduced at
the 2010 CWWCA mid-year confer-
ence. Currently, there is one indi-
vidual enrolled in the program.
The apprenticeship program will
be announced again at the 2011
annual meeting.

Hydraulic Fracturing
The NGWA has received positive
feedback from Dianna DeGette,
key sponsor of the “FRAC-act,”
which eliminates EPA Clean Drink-
ing Water exemptions for hydraulic
fracturing. The NGWA’s goal is to
exempt water well fracturing from
the requirements of the FRAC-act.

Cistern Permitting
Cisterns installed on a well source
or to be installed on a well source
must be installed by a licensed
pump installation contractor.
There are no plans for specific
DWR permits for installation of
cisterns.

Board of Examiners Vacancy
The TWG discussed the vacancy on
the Board of Examiners (BOE).
There are five members of the
BOE: One delegate from the State
Engineer’s Office; one delicate

(Continued on page 13)
KEY WASHINGTON MIDTERM ELECTION IMPACTS AND RESULTS

Riding a wave of voter anger over rising deficits and continued unemployment, Republicans swept into office capturing the majority of the House of Representatives and increasing their numbers in the Senate, but did not win the majority, this week.

While not all the races are decided yet, House Republicans will have a large majority in the 112th Congress and are expected to propose substantial cuts to spending and extension of tax breaks.

A key change in Colorado was the defeat of Rep. John Salazar (D) and election of Scott Tipton (R). Also, note the defeat of Rep. Markey (D) and election of Cory Gardner (R).

The House Transportation and Infrastructure (T&I) Committee will be undergoing many changes after the elections this week. Chairman James Oberstar (D-MN), who has served on the Committee since he was elected in 1974, was defeated in his reelection battle and with Republicans taking control of the House, it appears that current Ranking Member John Mica (R-FL) will assume the chairmanship.

With Mica as the likely chairman of the full T&I Committee, the policy emerging out of the panel could vary significantly from the Oberstar-led committee. The biggest changes could be reflected in the surface transportation authorization. The draft produced by Chairman Oberstar will likely be overhauled to emphasize Mica’s policy initiatives and financing proposals.

Rep. Mica has in the past deemed an increase in the gas tax dead and has suggested replacing the per-gallon tax with a percentage sales tax. He has also advocated for more public-private partnerships and the speedier approval of infrastructure projects. In an interview with the National Journal this week, Mica reiterated his opposition to raising fuel taxes, “You could unleash hundreds of billions [of dollars of private capital]... we’re going to look at every way we can do things without trying to raise taxes.”

KEY COLORADO ELECTION IMPACTS AND RESULTS

The state house will be controlled by the Republican Party with Rep. Frank McNulty as Speaker of the House. Rep. McNulty, from Highlands Ranch, has served as an Assistant Director for the Department of Natural Resources, (I worked

(Continued on page 13)
Driller and/or Pump Installer Apprenticeship Program

This apprentice program supported by the Colorado Water Well Contractors Association (CWWCA) is a voluntary program for CWWCA members, developed to assist individuals that would like to obtain a water well driller license and/or a pump installation license in the state of Colorado. Records will be kept by the CWWCA and available to the applicant to provide proof of experience to the Board of Examiners (BOE) during the license application process.

(a) A person who wishes to undertake the CWWCA approved apprentice program under the supervision of a licensed well driller and/or a licensed pump installer who has been licensed for a minimum of two years, must submit a registration form (Form Attached) to the CWWCA and provide proof that the licensed well driller and/or pump installer has agreed to accept the responsibility of supervising the training. A driller or pump installer may not supervise more than three apprentices at any one time. Persons with both a well driller and pump installers license may register a maximum of six apprentices (three of each type) at any one time.

(b) A registered driller or pump installer apprentice shall represent his supervising driller or pump installer during operations at the well site.

(c) The CWWCA Board of Directors shall review driller and/or pump installer registration forms.

(d) A registered driller/pump installer apprentice may not perform, or offer to perform; any services associated with drilling or pump installing except under the supervision of a licensed driller/pump installer and according to the supervising driller/pump installer’s express directions. A driller/pump installer apprentice’s registration may be revoked for engaging in prohibited activities.

(e) Registration forms shall include:

1. The name, business address, and permanent mailing address of the apprentice in training
2. The name, business address, and license number of the licensed driller and/or pump installer who will supervise the training
3. A detailed description of the training program, including the types of wells to be drilled and/or the classifications of pumps to be installed, equipment used, safety training and procedures, and experience, knowledge, and qualification benchmarks while under apprenticeship.
4. The effective commencement and termination date of the training program
5. A statement by the licensed driller and/or pump installer accepting financial responsibility (under the licensed contractors bond) for the activities of the apprentice associated with the training program or undertaken on behalf of the licensed driller or pump installer, and
6. The signatures of the apprentice and the licensed driller and/or pump installer and the sworn statement of both that the information provided is true and correct.

(f) If the application conforms to the rules and the apprenticeship program meets the CWWCA requirements, the CWWCA will notify the apprentice and the supervising driller and/or pump installer that the applicant has been accepted as a registered driller and/or pump installer apprentice and that the registration form shall remain in the CWWCA’s files for the stated duration of the apprentice program.

(g) If the application and apprentice program do not conform to the rules or is not approved, the CWWCA shall notify the apprentice and the apprentice’s supervising driller and/or pump installer of the disapproval.

Responsibilities of the Apprentice and Supervising Driller and/or Pump Installer

(a) A registered driller/pump installer apprentice shall:

represent his supervising driller/pump installer during operations at the well site:

(b) If a replacement pump is installed a Pump Installation and Test Report should be filled out and sent to the CWWCA, even though it is not required by the State.

(Continued on page 11)
is achieved; and
perform services associated with drilling, deepening, or altering a well and/or installing pumps under the supervision of the supervising driller/pump installer.

(b) A registered driller/pump installer apprentice may not perform, or offer to perform, any services associated with drilling, deepening, installing a pump or altering a well except under the direct supervision of a licensed driller/pump installer and/or according to the supervisor’s express directions. A driller/pump installers apprentice’s registration may be revoked for engaging in prohibited activities.

(c) Upon completion of a training program of at least two years and the completion of at least 20 wells (new and/or redrills) and/or the installation of 20 pumps (new and/or replacement), an apprentice may apply to obtain a well driller’s/pump installer’s license or to renew the status as an apprentice. The supervising driller, pump installer or apprentice may terminate the training program by written notice to the CWWCA. A reason for termination is not required. Upon receipt of the notice, the CWWCA shall terminate the apprentice’s status as a registered apprentice.

(d) Upon renewal of an apprentice registration, the supervising driller and/or pump installer shall provide the CWWCA a written progress report on the aforementioned training segments pertaining to the apprentice’s stated training program.

(e) the licensed driller and/or pump installer shall be present at the well site at all times during all operations or may be represented by a registered apprentice capable of immediate communication with the licensed driller or licensed pump installer.

(f) The licensed driller and/or pump installer is responsible for compliance with the Rules and Regulations for Water Well Construction, Pump Installation, Cistern Installation, and Monitoring and Observation Hole/Well Construction (Construction Rules) 2 CCR 402-2.

(g) If the supervising driller or pump installer is unavailable, he may be represented by another licensed driller or pump installer who:

1. is employed by the apprentice’s employer; and
2. is either at the well site or can be reached by phone or radio.

Continuing education as it applies to the apprentice program
By the end of the each year of apprenticeship the apprentice must attain two continuing education hours. At the end of the apprenticeship, the apprentice must comply

well with him on several issues) he is familiar with groundwater issues.

It is too early to make much of the rest of the new committee assignment. In the Senate, Sen. Bruce Whitehead (D), failed to be re-elected. This is significant due to the water and groundwater knowledge Whitehead had. He was targeted as a potential sponsor for support of legislation supporting Division of Water Resource programs. The key issue will again be the state’s budget and how the House works with the Democrat controlled Senate and Governor.

(Continued from page 8)

from the Colorado Department of Public Health and Environment; two Governor-appointed experienced contractors; and one Governor-appointed experienced technical representative. The technical Governor-appointed position has been vacant since June 30, 2010. Currently, Jack Byers is the only applicant for the position. Reportedly, the Department of Natural Resources will be reluctant to act on the vacancy until there are three applicants for the position. The CWWCA has exclusively endorsed Mr. Byers with a letter to Governor Ritter.

**Future Topics**
- DWR Budget Update (brief)
- NGWA well construction standards update
- CWWCA Apprenticeship Program
- Hydraulic Fracturing (if needed)
- Colorado Ground Water Association coordination with CWWCA for presentations
- BOE Vacancy (if needed)

Respectfully submitted by Daniel Niemela.

PROBLEM: LOW PRESSURE

SOLUTION: SUBDRIVE INLINE 1100

Supplying Consistent Water Pressure

Franklin Electric’s Sub Drive Inline 1100 provides constant pressure for both private wells and municipal/city water systems.

Features:

- A complete and package system
  - Pump, motor, drive and pressure switch in one box
- Small and compact design
  - Fits into small areas, even between floor joists
- Stainless steel construction
  - Made for years of operation
- Simple and easy installation
  - Step-by-step illustrated instructions
- Quiet and cool operation
  - Integrated motor design allows water to flow around it
- NEMA 4 electronics enclosure
  - Can be installed indoors and outdoors
- Multiple mounting configurations
  - Lets you install the units where you need it:
    Horizontal, vertical & even upside down

with the existing rules for continuing education as set forth in the BOE rules 2 CCR 402-14 concerning continuing education to obtain a drillers and/or pump installers license. A Continuing Education form (similar to the one provided to the licensed contractors by the State during the renewal process each year) will be provided to the apprentice at the end of each calendar year so the CE’s earned can be documented. A copy of this form will then be sent to the CWWCA and be added to the apprentice’s file.

How Does Pulstar Stand Out from the Competition?

- Planetary Gear Drive on Main Winch: Maintenance Free, 0% Defect or Failure Record
- Mico-Failsafe Brake on Main Winch Drum: Never Lose a Live Load in the Event of Hydraulic Failure
- Failsafe Disc Brakes on All Winches
- Char Lynn Hydraulic Motors: Most Quiet & Durable on the Market
- Single Line Speed 140fpm (vs. 100fpm for “Brand S”)
- 4” Mast Cylinders With 2” Rods (vs. 3.5” Cylinders & 1” Rods on “Brand S”)
- Flat Bed Sanded, Primed, Under Body Coated & Painted

Pulstar P10000HD3L

- Additional Mast Height
- Front Outrigger
- Long Jacks
- Hydraulic Oil Cooler
- Heated Hydraulic Reservoir
- Hydraulic Power to Rear
- Halogen Light Kit
- Sand Reel
- Wire Spool Mounts
- Utility Body or Flatbed
- Extra Heavy Duty Tailgate
