WEBSITE ADVERTISING

BANNER ADVERTISING
Banner advertisements appear on the right of every page of the website. The advertisement rotates sequentially, so every ad will have equal display time. If the demand for banner advertisements warrants it, additional banners will be incorporated into the site.

One-Year Banner Advertisement: $300
If the advertiser is a CWWCA member, this fee also includes a free upgrade of your member directory listing. Banner ads should be 150 pixels wide, and 150-300 pixels high. Ads must be submitted in .jpg format.

MEMBER DIRECTORY UPGRADE
CWWCA Members may choose to upgrade their listing in the searchable member’s directory.
Upgrading allows your listing to be displayed at the top of searches and sorts. It allows your listing to link to your web site. And upgrading allows you to display your LOGO or Picture of your choice with your listing.

One year of Directory upgrade: $50.00
Pictures for the listing should be submitted in .jpg format and should be 80 pixels high, by 80-160 pixels wide.

the DRILLSTEM  2  Spring 2012
President’s Letter

I would like to start by thanking everyone who helped out with the CWWCA Annual conference and meeting in January. Special thanks to Sherry and the girls for all they do to keep it running smoothly. I was very pleased with the turnout we had this year. It is always good to see familiar faces as well as new ones who share my interests. I heard a lot of positive feedback on the vendor’s exhibit this year. Thanks to Kate for all the hard work she did on the auction. Thanks to Bruce Heir and the band for a wonderful performance. Those in attendance had a great time. As always, if anyone has any suggestions or ideas for future conferences either annual or midyear, we would love to hear from you. We are always looking for fresh ideas for continuing education.

As we move forward this year we continue to face many challenges. Among them are the economy and how do we not just survive, but thrive. Hydro fracturing continues to be a hot topic in the news. Our biggest challenge is how do we continue to provide good quality water to an ever growing population. As an organization we have the knowledge and ability to address these issues, something we cannot do by ourselves.

One of my goals is to try to get people excited about this industry and to get them more involved in the CWWCA. As I looked around the room at the conference one of the things I notice is the aging of our workforce. It is good to see young people involved as they are our future. I feel we need to try to get more of the younger people excited about this industry. I have several young men who work for me who not only enjoy the work they have a passion for it. It is good to know that our future is in good hands.

I look forward to the upcoming year and moving forward. As anyone who knows me can attest, my ear is always available. I would love to see everyone at the midyear conference this year. Have a great year.

Thank You

Gene Wagner
COLORADO PUMP & SUPPLY
A Colorado founded company since 1890

We appreciate your support here at CPS, we know the big guys “national companies” have taken over our market place and it makes it harder than ever for a local Colorado company to compete. We would like the opportunity to show you how CPS can work with your company to help you with the challenges we all face in business today.

Give us a call today!

ANNUAL CONFERENCE 2012 NGWREF  
MCElLHINey LECTURE

I wish to express my sincere gratitude and appreciation for the gracious hospitality that was extended to me at the CWWCA. The hotel and conference center were outstanding, and the hotel even brought extra treats by my room each day! I know these events require a huge amount of effort and coordination, so I just want you all to know that I was impressed by the CWWCA organization and its members, and I greatly appreciate the opportunity to speak to your group. Please pass along my thanks to all the CWWCA officers and others who organized this conference.

Best Regards,  
Marvin F Glotfelty, R.G.

Driller and/or Pump Installer Apprenticeship Program

This apprentice program supported by the Colorado Water Well Contractors Association (CWWCA) is a voluntary program for CWWCA members, developed to assist individuals that would like to obtain a water well driller license and/or a pump installation license in the state of Colorado. Records will be kept by the CWWCA and available to the applicant to provide proof of experience to the Board of Examiners (BOE) during the license application process.

(a) A person who wishes to undertake the CWWCA approved apprentice program under the supervision of a licensed well driller and/or a licensed pump installer who has been licensed for a minimum of two years, must submit a registration form (Form Attached) to the CWWCA and provide proof that the licensed well driller and/or pump installer has agreed to accept the responsibility of supervising the training. A driller or pump installer may not supervise more than three apprentices at any one time. Persons with both a well driller and pump installers license may register a maximum of six apprentices (three of each type) at any one time.

(b) A registered driller or pump installer apprentice shall represent his supervising driller or pump installer during operations at the well site.

(c) The CWWCA Board of Directors shall review driller and/or pump installer registration forms.

(d) A registered driller/pump installer apprentice may not perform, or offer to perform; any services associated with drilling or pump installing except under the supervision of a licensed driller/ pump installer and according to the supervising driller/pump installer’s express directions.

A driller/pump installer apprentice’s registration may be revoked for engaging in prohibited activities.

CWWCA 2012 ANNUAL CONFERENCE EXHIBITORS

ON BEHALF OF CWWCA
“THANK YOU” FOR YOUR GENEROUS SUPPORT
Maui Paradise!

Come join Preferred Pump in a Maui Paradise! January 6, 2013—January 12, 2013 we will be soaking the sun on the beautiful islands of Hawaii. We’ll be staying in the Hyatt Regency Resort & Spa! See you there!

It's EASY to earn points for Travel & Merchandise...

We keep it straight forward. From January 1st to December 31st, Preferred customers earn points redeemable for travel or merchandise... simply by purchasing quality goods at our everyday low prices. Preferred customers earn points at the rate of one point for every $1,000 shipped and invoiced during this period. That’s it - there’s nothing to it!

After our Open Enrollment Period, we will send you a statement each month so you can keep track of your progress toward the awards of your choice.

Sure... now you’re thinking there must be more to it than this. Well, we do need to make sure we know exactly which awards you want, so you’ll need to fill out an Enrollment Form. But that’s about all the effort required on your part... there are no buy-ins, pre-qualifying initial orders, or buying material at list price to qualify!

Enroll now, and before you know it, you’ll be redeeming points for amazing trips and fantastic merchandise! Don’t wait - enrollment ends March 31st, 2011!

Making your life easier...

Pulstar

For more information call us TOLL FREE (866) 478-6336
(Continued from page 7)

(e) Registration forms shall include:
1. The name, business address, and permanent mailing address of the apprentice in training
2. The name, business address, and license number of the licensed driller and/or pump installer who will supervise the training
3. A detailed description of the training program, including the types of wells to be drilled and/or the classifications of pumps to be installed, equipment used, safety training and procedures, and experience, knowledge, and qualification benchmarks while under apprenticeship.
4. The effective commencement and termination date of the training program
5. A statement by the licensed driller and/or pump installer accepting financial responsibility (under the licensed contractors bond) for the activities of the apprentice associated with the training program or undertaken on behalf of the licensed driller or pump installer, and
6. The signatures of the apprentice and the licensed driller and/or pump installer and the sworn statement of both that the information provided is true and correct.

(f) If the application conforms to the rules and the apprenticeship program meets the CWWCA requirements, the CWWCA will notify the apprentice and the supervising driller and/or pump installer that the applicant has been accepted as a registered driller and/or pump installer apprentice and that the registration form shall remain in the CWWCA’s files for the stated duration of the apprentice program.

(g) If the application and apprentice program do not conform to the rules or is not approved, the CWWCA shall notify the apprentice and the apprentice’s supervising driller and/or pump installer of the disapproval.

Responsibilities of the Apprentice and Supervising Driller and/or Pump Installer

(a) A registered driller/pump installer apprentice shall: represent his supervising driller/pump installer during operations at the well site: driller/pump installer apprentice shall co-sign the state reports (in the remarks area under Section 5. GEOLOGIC LOG of the Well Construction and Test Report for well drillers and under Section 9 on the Pump Installation and Test Report for pump installers. If a replacement pump is installed a Pump Installation and Test Report should be filled out and sent to the CWWCA, even though it is not required by the State.) with the supervising driller/pump installer until the required number of installations is achieved; and perform services associated with drilling, deepening, or altering a well and/or installing pumps under the supervision of the supervising driller/pump installer.

(b) A registered driller/pump installer apprentice may not perform, or offer to perform, any services associated with drilling, deepening, installing a pump or altering a well except under the direct supervision of a licensed driller/pump installer and/or according to the supervisor’s express directions. A driller/pump installers apprentice’s registration may be revoked for engaging in prohibited activities.

Technical Working Group Meeting Recap

September 9, 2011
TWG Meeting Recap
Chase Bank Building
333 West Hampden Ave., Englewood, CO 80110

BOE Vacancy
Jeff Canfield’s Governor appointed experienced contractor representative term ended June 30, 2011. As of the September 9, 2011 TWG meeting the contractor vacancy had not been filled. The position was subsequently filled by octave George Blouin.

Cistern Installation on Well Source by Unlicensed Contractors
The issue of unlicensed contractors installing cisterns is reported to persist. The CWWCA Cistern Task Force committee drafted a letter to the BOE requesting attention to unlicensed installation of cisterns on water wells. (This letter was subsequently delivered to the BOE on October 4, 2011.)

DWR Budget

There were no new developments on the DWR budget. Well permit applications (excluding produced water permits) totaled approximately 2400 through September, up 2100 from 2010.

DNR Update
There have been no official changes or reports with regard to the Division of Natural Resources.

CWWCA Apprenticeship Program

(Continued on page 10)
The EXPO was February 9-10 at Aquarius Casino Resort, Laughlin, Nevada. We had a great time! We had an exceptionally good program and speakers this year and the rooms were filled. The exhibitors were many and had a lot to offer. The outside exhibits were smaller this year, we had some cancellations, but we should have more next year. The Buck Lively Scholarship Auction and raffle was fun. We raised $17,250 from the auction, $1,400 from the raffle and $1,260 from donations for a total of $19,910. This was lower than last year, but we had fewer donations. We did miss one of our best contributors from Colorado, Don and Linda Duerst. They have contributed so much and for so many years to the auction and the EXPO. We really did miss seeing them and hope to see them back next year. I want to thank the Coloradans who did attend the EXPO for their support. Hope you all had a good time! Our next EXPO will be February, 7-8, 2013.

AND ON ANOTHER BIG NOTE!
Kerry and I just got back from the Dominican Republic trip to Punta Cana with the Preferred Pump group. I think it was great that Preferred Pump donated this trip to the CWWCA Buck Lively Scholarship auction. This helped to raise funds for our scholarship AND we had a great time! The weather was great and we were able to see a lot of Colorado contractors there. We were really 'wined and dined' and many of the manufacturers put on some great excursions. We had a great time dancing to the live music that was provided by Preferred Pump at the closing dinner. "So glad were not here to encounter the cold and snow!"

George Wood
MSGWA, Chair

The CWWCA office has a copy of the BOE letter in support of the apprenticeship program. The CWWCA apprenticeship program remains under-utilized. Topics were discussed to support the program including CWWCA tutoring for enrolled apprentices. The DWR noted that they have a tutoring class available for the licensing examinations.

Hydraulic Fracturing
Courtney Hemenway is scheduled to present regarding hydraulic fracturing in Denver Basin aquifers at the October 4th BOE meeting.

The Colorado Oil and Gas Conservation Commission (COGCC)
The COGCC commissioned a study to review alleged water well contamination. The consultant concluded that one problem with contamination was inadequate water well construction. The DWR was to respond to the COGCC on this matter.

Future Topics
BOE Vacancy Filled (contractor)
DWR Budget Update
DNR Update
NGWA well Construction Standards Update

Respectfully submitted by Daniel Niemela.
2012 CWWCA INSTALLATION OF OFFICERS

CWWCA Website Committee Report

- The new CWWCA website is functioning well. Final payment for the website transition was made in May 2011.
- We have been coordinating with Symplitech for website content updates.
- There is a gap in the CWWCA website statistics as a result of the transition to the new website. I am uncertain if the new Google Analytics website statistics tracks usage in the same way as the previous Symplitech page visit tracking. Therefore, it is difficult to make comparisons between website statistics from 2010 with 2011.
- From July through December 2011, website use averaged 254 site visits and 908 page views per month.
- Although the events and news pages have received updates, additional content is appreciated, please send news articles, events and continuing education opportunities to the CWWCA office.

Respectfully submitted by Daniel Niemela

(Continued from page 9)

(c) Upon completion of a training program of at least two years and the completion of at least 20 wells (new and/or redrills) and/or the installation of 20 pumps (new and/or replacement), an apprentice may apply to obtain a well driller’s/pump installer’s license or to renew the status as an apprentice. The supervising driller, pump installer or apprentice may terminate the training program by written notice to the CWWCA. A reason for termination is not required. Upon receipt of the notice, the CWWCA shall terminate the apprentice’s status as a registered apprentice.

(d) Upon renewal of an apprentice registration, the supervising driller and/or pump installer shall provide the CWWCA a written progress report on the aforementioned training segments pertaining to the apprentice’s stated training program.

(e) the licensed driller and/or pump installer shall be present at the well site at all times during all operations or may be represented by a registered apprentice capable of immediate communication with the licensed driller or licensed pump installer.

(f) The licensed driller and/or pump installer is responsible for compliance with the Rules and Regulations for Water Well Construction, Pump Installation, Cistern Installation, and Monitoring and Observation Hole/Well Construction (Construction Rules) 2 CCR 402-2.

(g) If the supervising driller or pump installer is unavailable, he may be represented by another licensed driller or pump installer who:
1. is employed by the apprentice’s employer; and
2. is either at the well site or can be reached by phone or radio.

Continuing education as it applies to the apprentice program

By the end of the each year of apprenticeship the apprentice must attain two continuing education hours. At the end of the apprenticeship, the apprentice must comply with the existing rules for continuing education as set forth in the BOE rules 2 CCR 402-14 concerning continuing education to obtain a drillers and/or pump installers license. A Continuing Education form (similar to the one provided to the licensed contractors by the State during the renewal process each year) will be provided to the apprentice at the end of each calendar year so the CE’s earned can be documented.

A copy of this form will then be sent to the CWWCA and be added to the apprentice’s file.
For almost three decades Groundwater Professionals have turned to Western Hydro Corporation for the equipment and materials they need, to provide their customers with plentiful and safe drinking water.

Western Hydro carries ITT Goulds/Red Jacket Pumps and Pentair STA-RITE/ Berkeley/Myers Pumps, consisting of...

In Remembrance Of
Theodore Ray “Shorty” Hamacher

On Sunday, January 8, 2012 a great man went to be with the Lord. Theodore Ray “Shorty” Hamacher age 83 of Simla, Colorado passed away at the Penrose Main Hospital in Colorado Springs, Colorado. He was born in a little farmhouse on March 21, 1928 in rural Matheson, Colorado. Shorty was the son of Theodore Victor and Ruby Faye (Dunn) Hamacher. He was baptized at the age of 14 on December 31, 1942 at the Community Evangelical Church at the Watch Night Service by T.A. Marks.

When Shorty was in 8th grade at the age of 13, his father told him he was done with school and it was time to start helping him drill wells. Shorty’s dad sent him to Deer Trail, Colorado to drill. From 8th grade on, Shorty drilled wells for a living. Work became a hobby for Shorty and it was because he never considered work, work. He loved what he did and he was great at it. No job was too big or too small for Shorty. He would never ask anyone to do a job that he wouldn’t do himself. He taught his children and grandchildren how to drill and operated Hamacher Well Works in Simla, Colorado for over 60 years. He was blessed to be able to find and live out his passion.

Shorty and the love of his life, Bonnie Dolores (Nickell) Hamacher met and fell in love as young teenagers in Simla, Colorado. They were married on June 11, 1946 at Simla Baptist Church. They were the first couple to be married at that church. They then moved to his fathers ranch south of Matheson where they farmed beans, wheat, raised cattle and drilled wells. Shorty and Bonnie have five children together, Alan Ray, Beverly, Dawna Lou, Brenda and Ted.

As a young man, Shorty enjoyed horseback riding and spent much time breaking horses. He also enjoyed elk hunting, water skiing, boating, and riding motorcycles. He was never afraid to try something new and different. Shorty and his wife Bonnie embarked on many adventures together. They enjoyed traveling all over the United States together in their motor home and spent a lot of time in Las Vegas, Tucson and Oklahoma visiting family. They had so much fun together enjoying the sights and scenery along their travels. They always visited family or friends who were along their journey. Bonnie and Shorty went on many cruises to Alaska, Virgin Islands, and Mexico. They also went on family trips with their children to beautiful resorts in Hawaii, Mexico and Jamaica.

Shorty was a man who truly cared about people. His family, friends and community were always very dear to his heart, and he took pride in giving back to others. He is described as a man who would give the shirt off his own back for anybody needing help while never thinking twice about it. Shorty helped many people in his community as well as helping his congregation re-purchase their church from the Methodist Conference when it switched and became the Matheson Community Bible Church.

Shorty was always a gentle soul. He was a man of great integrity and was greatly respected by his family, colleagues and the community that he loved so much. Shorty had a way with children. Although his hands may have be torn and calloused from work, he gently held his 5 children, 14 grandchildren and 13 great grandchildren. His loving hands will be greatly missed by the three great grandchildren who are on the way. Shorty’s spirit, his character and his legacy will live forever through his loving family.

Shorty was a member of the Matheson Community Bible Church in Matheson, CO; a member of the Better Business Bureau; the National Ground Association, the Colorado Division of Water Resources; and the Colorado Water Well Association.

He is survived by his loving wife of 65 years, Bonnie, two sons, Alan Ray Hamacher (wife Sandy) of Simla, Colorado and Theodore Eugene (wife Bonnie Jo) of Simla, Colorado; two daughters, Dawna Lou Eurich (husband Gordon) of Simla, Colorado and Brenda Kay Rigden (husband Greg) of Highlands Ranch, Colorado; one brother, Darriel Hamacher; four sisters, Ilene Allison, Betty Hall, Dolly Atkins and Darlene Holliman; fourteen grandchildren; and thirteen great grandchildren.

Shorty was preceded in death by his parents, two brothers and his loving daughter, Beverly Sue Schifferns.

Memorial contributions may be made to the Matheson Community Bible Church, P.O. Box 128, Matheson, CO 80830 or to the Cross Roads Youth Center, P.O. Box 371, Simla, Colorado 80835.

The Love Funeral Home of Limon, CO was in charge of arrangements. Please visit our website at www.lovefuneralhomes.com to sign our online guest book or to send your message of condolence to the family.

The Real Value of Employee MVRs.

Insurance companies often exclude coverage on employee drivers with speeding tickets, moving violations, and DUT’s in their past.

This limits the risk posed by these individuals to the insurance company, and keeps the employer’s insurance cost to a minimum.

So, exactly what does this mean for you if one of your employees has a poor Motor Vehicle Record (MVR)? What are the ramifications that affect your bottom line?

Regardless of where you do business, an insurance company has two basic choices:

1. Accept your employee with the poor MVR, increase your rate and charge you a premium appropriate for the increased driving risk.

2. Decline to offer your company insurance, period.

What does this mean to you, the employer?

1. Employee MVR’s and driving history matter. An employee’s driving history impacts that employee’s value and should be carefully taken into consideration before making a hiring decision.

2. Your current employee’s personal MVR and driving habits will directly affect your auto insurance rates and premium.

3. Your company’s insurability is on the line. One bad MVR could cause an insurance company to not want your business or discontinue doing business in the future.

4. If your commercial insurance package is split between multiple companies, you may be subject to coverage gaps, protection issues, and unseen costs.

5. Worst case scenario, the employee with a poor MVR causes an accident prompting a lawyer to go after your personal assets.

The bottom line: We encourage you to choose your employees carefully. Run MVR’s before making a hiring decision.

Get a quote? Give us a call today. We can start working on your policy anytime during the year. We look forward to working with you!
