PROGRAM

CWWCA MID-YEAR CONFERENCE

JULY 12-14, 2013

BEAVER RUN RESORT, BRECKENRIDGE, CO

Friday, July 12

AM  8:45-9:00  CWWCA Board of Directors Only-Working Meeting
  9:00-10:00  Technical Working Group
  9:00          Registration
 10:00-10:50  Well Augmentation Plans. Dan Niemela, P.G.
               Bishop-Brogden Associates, Inc.
 11:00-11:50  Well Design with the Pump in Mind. Scott Orr,
               Hydro Resources Rocky Mtn, Inc.
 12:00-1:00  Lunch

PM  1:00- 1:30  Meet with the Supplier’s Table Top Exhibits
  1:30- 3:30  Well Design-What Makes Cents. Thom Hanna, P.G.
               Johnson Screens
  3:30-3:45  Break
  3:45-4:45  Well Yield Tests. Chris Sanchez, P.G.
               Bishop-Brogden Associates, Inc.
  4:00       Suppliers Meeting
  5:00-8:00  Supplier Sponsored Social Hour-Cocktails/Dinner Buffet

Saturday, July 13

AM  7:00-8:00  Breakfast Buffet
  8:00-8:50  D.O.T. Compliance: Current, Future & Proposed Regulations.
               Patti Gillette, Colorado Motor Carriers Association Dir. of Safety
  9:00-10:00  Membership Meeting
 10:00-10:50  No Lead Rule Changes. Anthony Estrada. ANT Sales, Co.
 11:00-noon  Well Water Quality Field Analyses. David Wilson,
               Baroid, IDP

EIGHT CONTINUING EDUCATION HOURS AVAILABLE
Continuing Education Ends – Enjoy “fun” time in Breckenridge!

WEB SITE ADVERTISING
BANNER ADVERTISING
Banner advertisements appear on the right of every page of the website. The advertisement rotates sequentially, so every ad will have equal display time. If the demand for banner advertisements warrants it, additional banners will be incorporated into the site.

One-Year Banner Advertisement: $300
If the advertiser is a CWWCA member, this fee also includes a free upgrade of your member directory listing. Banner ads should be 150 pixels wide, and 150-300 pixels high. Ads must be submitted in .jpg format.

MEMBER DIRECTORY UPGRADE
CWWCA Members may choose to upgrade their listing in the searchable member’s directory.
Upgrading allows your listing to be displayed at the top of searches and sorts. It allows your listing to link to your web site. And upgrading allows you to display your LOGO or Picture of your choice with your listing.

One year of Directory upgrade: $50.00
Pictures for the listing should be submitted in .jpg format and should be 80 pixels high, by 80-160 pixels wide.

Common and Costly Mistakes: Workers’ Comp Injuries

Q: Our company does not want to hire individuals who present workers’ comp risks. Can we ask about prior workers’ compensation injuries during the interview process?

A: No. The Americans with Disabilities Act (ADA) prohibits private employers, state and local governments, employment agencies and labor unions from discriminating against qualified individuals with disabilities in job application procedures, hiring, firing, advancement, compensation, job training and other terms, conditions and privileges of employment. Specifically, the ADA covers employers with 15 or more employees, including state and local governments. It also applies to employment agencies and to labor organizations. An individual with a disability is a person who has a physical or mental impairment that substantially limits one or more major life activities, has a record of such impairment or is regarded as having such impairment.

You and any other interviewers should be trained to clearly describe the requirements of the job, and to focus on the applicant’s ability to meet them. Any candidate may be asked if he or she is able to perform all of the essential job assignments safely. You may inquire as to the applicant’s ability to perform both essential and marginal job functions.

You may make medical history inquiries and even require a medical examination after you offer an individual a job, provided that individuals who are in similar positions are required to do the same. You may then screen out individuals who are physically unable to perform the job’s essential functions provided there is not a reasonable accommodation that would allow them to do so.

If you discover after an offer of employment has been made that the individual does not have a disability and has made multiple workers’ compensation claims in the past, you can factor that information into your final hiring decision.

All personal health information gathered needs to be kept confidential and in compliance with HIPAA. Keep health information in a separate file from other personnel records.

At VolkBell Property & Casualty, we deliver opportunity for lower premiums, superior coverage, and trusted protection to CWWCA members.

Laddy Trehal

“As a member of 4-H I have become passionate about the beef industry and all that it entails. I have exhibited cattle and livestock at the local, state and national levels. This has instilled in me a strong basis for my future goals." People in “the United States have concerns about food safety, especially in the beef industry. For this reason, I plan to direct my career towards informing people about agriculture. I am continuing my education with a major in animal science and a minor in agriculture business; this is critical in achieving the goals I have set for myself. I have had community involvement and leadership roles that will help me be successful in the future."

“I am interested in pursuing this field of study because I think it is important to inform people about the beef industry and current issues that it faces…. One day I hope to be a role model…."

“I have set my goals high and plan to accomplish them with hard work and dedication. I want to be a leader of the beef industry…. A strong academic background is essential to reaching the high standard that I have set for myself and I will tirelessly work towards a degree in agriculture.

Tyler Pitcher

“My goals for the future are to attend Colorado School of Mines for engineering and get a job that I love to do. Upon completion of high school, I will go to Mines and learn about geological engineering or perhaps environmental engineering. Last semester, I took a geology class and an introduction to engineering class at my school and I am very intrigued by them…. That is why I think that geological or environmental engineering is the right subject for me. Both of these fields relevant to ground water …. Mines has a one hundred percent placement ratio so I think that I could get a job I enjoy. Since I have already received my acceptance letter at Mines and I have decided that I am going to attend the school, I believe that my educational and career goals will be achieved.”

(Continued on page 7)
TWG Meeting Recap
Chase Building
333 West Hampden Ave., Englewood, CO 80110

Next TWG Meeting:
9:00 – 10:00 AM, Friday, July 12, 2013
Beaver Run Resort
Breckenridge, CO

Tentative Future TWG Meeting Date
Friday, October 4, 2013
Chase Bank Building
333 West Hampden Ave., Englewood, CO 80110

Attendees:
Fred Baros, Todd Hunter, Wayne Parrish, James Powers, Jarod Kuntz, Travis Day, Keith Branstetter, Mike Wiedorn, Gene Wagner, Robert Cockerham, Nolan Lloyd, Brad Himes, and Joe Meigs

Moderator for July 12, 2013 Meeting:
Joe Meigs

DWR Report
Again, two well inspector positions remain vacant due to lack of funding. Ongoing efforts are to find additional funding to increase the number of well inspectors. Well permit applications for the time period May 2012 to April 2013 are at 4,339. This is 913 more permit applications received than during the same time period last year.

Colorado Geologic Survey (CGS) Report
The CGS is now part of the Colorado School of Mines. At present, the CGS is still at 1313 Sherman Street. A move is being contemplated sometime over the summer to a new location in Golden. CGS staff phone numbers remain the same; however, their e-mail addresses have changed.

NGWA Water Well Construction Standards
Todd Hunter reported that the American Water Works Association (AWWA) has appealed the NGWA Water Well Construction Standards calling it a “competing document” to AWWA’s water well construction standards. A resolution will, hopefully, be mediated soon.

Board of Examiners (BOE) Vacancy
On June 30, 2013, Joe Bender’s Governor-Appointed contractor position on the BOE will end. Jarod Kuntz has indicated that he will apply to fill the vacancy.

Well Construction Standards
The Board of Examiners reviewed the use of corrugated pipe for shallow well construction and determined that corrugated pipe could not be used for this type of well construction because the pipe does not meet the minimum wall thickness standards.

Future Topics
CWWCA CGWA CGS Task Force
Respectfully submitted by Joe V. Meigs
CWWCA Buck Lively Scholarship Winners (cont.)

Samantha Trehal

“Throughout my high school career being an honor roll student is something I have taken great pride in. Balancing good grades along with the numerous 4-H events I have been part of and the sports I have played for four years, has only come as a result of hard work. Not only livestock judging, but 4-H as a whole, has taught me more than any one thing I have ever done and it has helped me to realize how passionate I am about animals and the agricultural industry.”

“My academic accomplishments are some of my proudest. I have been on the Kiowa High School honor roll through all four years; in addition, I have been on the Academic All-conference and honorable mention All-state teams. Not only have I been selected as team captain by my coaches in both volleyball and basketball, but I have been selected as an All-Conference player four times and in my junior year I was invited to play on the southern Colorado all-star basketball team…. I have been on the Colorado All-state livestock judging team the past five years, and the Colorado Senior All-star team the past two years, which allowed me to judge at the premier stockman in Indian in 2011”… and in other prestigious shows.

I plan to earn an associate’s degree in animal science and then pursue a dual major bachelor’s degree in both animal science and agricultural business. After that my plan is earn “a master’s degree in bovine reproduction or continue to veterinary medicine.”

Cody Wessbecker

“I believe that setting goals for yourself is one of the most important things you can do to prepare for and succeed in your future. Goals keep you focused, motivated and organized while achieving the things you want most in life. When I attend Colorado State University… I want to prepare myself to be a successful and well-rounded individual following graduation.”

“I will be entering Colorado State with an undeclared major and although my degree is still uncertain my goals and aspirations are not. Working with water has been in my family for generations. My uncle has owned Colorado Pump for about 30 years now…. Whether it is in business, law or engineering, the importance of water and the fact that is not an endless resource as most people think, will most definitely have an impact on whatever career path I take.”

“I’ve got the mindset and head on my shoulders to become successful. Now it is time for me to go out there and show the world what I am made of and what I can do. This scholarship would greatly help and I can guarantee that if chosen to receive this, I would make the most of it and excel.”
MacKenzie Stewart

“My academics continue to be my main focus. My major is History, and my minor is Economics. I made the College of Arts and Sciences Dean’s list 2nd semester of last year with a 4.0 GPA, and again for my 1st semester this year with a 3.85 GPA.

I am also a Marine Option Midshipman with the Naval ROTC Unit. I have been given the honor of being Platoon Commander and I oversee 3 squads. This summer I will attend Mountain Warfare Training for 2 weeks. When I return, I am looking forward to working on the drilling rig for the remainder of the summer.

Upon completion of my Marine Corps commitment, my goal is to return to Colorado and continue working in the water well industry with our family business, Stewart Water Well, Inc.

Because of my rigorous academic and NROTC schedule, I have little time for a part time job. The Buck Lively Scholarship was a great help to me the past 2 years. I appreciate being considered once again for the 2013 Scholarship.”

Shawn Beiriger

“My name is Shawn Beiriger…. I am interested in [the] Pre-Med program.

I would like to tell you about you about my accomplishments in High School. I am a member of National Honor Society as nominated by my counselor and teachers. We have contributed to many community projects and volunteered with food distribution and cleaning of our city park and areas. I have maintained a 3.5GPA. I have volunteered as a coach for Pee Wee Wrestling and have helped with elementary reading programs. I have participated in athletics all four years. Freshman and Sophomore cross country lettered and qualified for state. My Junior and Senior year I participated in football earning All Conference and lettering both years. My Senior year I was awarded All Conference and All Valley honors for defense. I have wrestled all four years, placing 6th as a freshman, 5th as a junior and in 2013 the State Champion at 152lbs. I have been approached by colleges to further my athletic career and I am hoping to be able to compete at that level. I thank you for your consideration.”

HOTEL INFORMATION

A block of rooms has been reserved at the Beaver Run Resort, Breckenridge, CO

**Make your reservations directly with the Hotel by June 11, 2013**

The unique ONE™ Tank filter system

Designed to replace smaller commonly used cartridge filters. Is the ideal solution for the removal of a multitude of particulates.

- Cartridges specially designed for higher flow rates and higher contaminant retention capacities
- Wide variety of application-specific cartridges available
- Easy access to cartridge for service and replacement purposes—no special tools required
- Option bottom drain—allow particles to flush from the stem and extends cartridge life

Effectively Used to Filter Water for a Multitude of Applications.

- Primary Filtration
- Polishing Filter
- RO Pre-filtration
- Process Water
- Cooling towers and chill water loops

Emily Wilson

“I’m into my second year at the University of Hawaii at Hilo, and I’ve already done so much. Last year I participated in a green turtle survey … and the information that we gather on them every year is crucial to the management of this threatened species. I lead a team of skin divers to assist NOAA scientists in the safe capture and tagging of the turtles.” I have learned rescue diving and participated in an underwater field school. I have done multiple reef surveys and other tagging projects. These experiences and seeing the beautiful things in the water have inspired me “to become a technical scientific diver for NOAA.” I am currently a crew member on the university’s research vessel and have “started a NAUI Dive Master training course, which will train me in the proper methods of teaching and leading scuba classes.”

“I have come a long way since last year, and a lot of my success is thanks to your support. … I am so grateful for your consideration.”

CONGRATULATIONS TO ALL CWWCA BUCK LIVELY SCHOLORARSHIP WINNERS!

Regulations for Mud Flaps on Semi Trucks

Distance and Mounting

Most states share a common formula for mud flap placement. Although the mathematics seem esoteric, they’re simply intended to keep water and debris from slipping from under the tire and hitting the car behind at an angle greater than 22.5 degrees. In inches, measure the distance from the tire’s rearmost point of contact (with the trailer fully loaded) with the road to where you'd like to mount the mud flap, and multiply it by 0.4142. Take that measurement, and measure upward from the ground at your desired mounting point; this is your maximum allowable mud flap ground clearance. Example: if you wish to mount the mud flap 18 inches from the rearmost contact point of the rear tire, multiply 18 by 0.4142; this gives you a maximum of 7.45 inches from the ground. A simpler calculation often used by roadside officials to determine angle is 5 inches of vertical rise for every 12 inches horizontal from the contact patch.

Ground Clearance

Regardless of the mudflap’s distance from the wheel center, one nearly universal rule is that it can never be more than ten inches from the ground. Many states (like Texas) have height restrictions under ten inches (usually eight inches while driving), but ten is the maximum allowable. Using the 0.414 rule of angle, maximum distance from the tire’s rear contact patch will rarely ever be more than 24.14 inches.
COLORADO PUMP & SUPPLY
A Colorado founded company since 1890

We appreciate your support here at CPS, we know the big guys “national companies” have taken over our market place and it makes it harder than ever for a local Colorado company to compete. We would like the opportunity to show you how CPS can work with your company to help you with the challenges we all face in business today.

Give us a call today!

MIX MASTER

The Safe Reliable Way to Disinfect Potable Water

- Water exits top of tank through stainless steel reinforced water connection.
- .8 baffle factor * means fewer tanks to maintain 4 log treatment standards.
- New Baffle design ensures uniform mixing and exceeds health agency contact time standards.
- Heavy Duty clench ring to stainless steel clips joins upper and lower water chambers.
- Holes in lower water chamber allow partially mixed water to enter outer chamber.
- Available in two sizes, 80 and 120 gallons

* Testing by Water Quality Association
