CWWCA MID-YEAR CONFERENCE

JULY 11 – 13, 2014
BEAVER RUN RESORT,
BRECKENRIDGE, CO

Friday, July 11
AM 8:45 9:00 CWWCA Board of Directors Only-Working Meeting
9:00 10:00 Technical Working Group
9:00 Registration
10:00 10:50 *Contracts 1 Hr* Mark Scharenbroich, Hydro Resources
11:00 11:50 *Disinfection & Discharge 1Hr*
Andrew Ross, CDPHE, David Wilson, Baroid, IDP
Noon 12:30 Lunch
PM 12:30 1:30 MEET WITH THE SUPPLIER’S TABLE TOP EXHIBITS
1:30 2:30 *Nebraska Grout Study 1 Hr* David Wilson, Baroid, IDP
2:30 2:45 Break
2:30 2:45 SUPPLIERS MEETING
3:00 4:45 *COLORADO Water Well Construction Rules
2 Hrs* Larry Finney, Matt Sares, Dan Niemela
5:00 8:00 SUPPLIER SPONSORED SOCIAL HOUR-COCKTAILS/
DINNER BUFFET

Saturday, July 12
AM 7:00 8:00 Breakfast Buffet
8:00 8:50 *Red Book 1 Hr* Dave Wilson, Baroid, IDP
9:00 10:00 Membership Meeting
Rules Discussion & Recommendations to Division of
Water Resources
10:00 10:50 *Certification Requirements to Protect
Colorado Aquifers 1 Hr* Paul Morgan, Colorado
Geological Survey
11:00 Noon *Residential Variable Frequency Drives,
Selection, Operation & Proper Installation
1 Hr* Kris Jackson, Pentair Flow Technologies

EIGHT CONTINUING EDUCATION HOURS AVAILABLE
Continuing Education Ends – Enjoy “fun” time in
BRECKENRIDGE!

GOLF RESERVATIONS: JAMES POWERS – 303.853.8855

Sunday, July 13
AM 9:00 Noon CWWCA Board of Directors Meeting/Working Breakfast

WEB SITE ADVERTISING

BANNER ADVERTISING
Banner advertisements appear on the right of every page of the website. The advertisement rotates sequentially, so every ad will have equal display time. If the demand for banner advertisements warrants it, additional banners will be incorporated into the site.

One-Year Banner Advertisement:  $300

If the advertiser is a CWWCA member, this fee also includes a free upgrade of your member directory listing. Banner ads should be 150 pixels wide, and 150-300 pixels high. Ads must be submitted in .jpg format.

MEMBER DIRECTORY UPGRADE
CWWCA Members may choose to upgrade their listing in the searchable member’s directory.

Upgrading allows your listing to be displayed at the top of searches and sorts. It allows your listing to link to your web site. And upgrading allows you to display your LOGO or Picture of your choice with your listing.

One year of Directory upgrade:  $50.00

Pictures for the listing should be submitted in .jpg format and should be 80 pixels high, by 80-160 pixels wide.

Note from the President

CWWCA wants to thank Nolan Lloyd for all his time and support. We wish him the very best as he enjoys his retirement.

Mid year is here and what a line up. Again, hats off to the program committee! This conference takes a lot to put together. Thanks to Sherry and her staff, they have done a great job. The mid-year membership meeting will be a great one for all members to attend. Breckenridge has a lot of activities to offer. Don’t forget to bring the family!

I hope everyone has a safe and prosperous summer.

Robert Cockerham
2014 CWWCA President

JOIN CWWCA IN BEAUTIFUL FUN BRECKENRIDGE, CO!
CWWCA Mid-Year Conference
July 11-12, 2014
BEAVER RUN RESORT-BRECKENRIDGE, CO

The CWWCA Board of Directors is working to improve your experience at the conference by changing the traditional format of the conference.

Our key objectives are to increase contractor and vendor participation by providing a program that will attract hydrologists, engineers, developers, and home owners. We believe that more contractors will participate in the conference if they have an opportunity to mingle with potential customers. Vendors will then benefit by having more contact with their contractor customers. Below is a proposed outline of conference objectives and a brief outline of the proposed program. **Ultimately we want to increase both contractor and vendor participation and create a positive financial experience for CWWCA.**

PROPOSED PROGRAM

**Friday, July 11**
- 10:00 am  5:00 pm  Continued Education Classes – 8 Hours of CE  
- Noon   12:30 pm  LUNCH  
- 12:30 pm  1:30 pm  Scheduled time for attendees to spend with Suppliers and their table top display!  
- 4:00 pm  SUPPLIERS MEETING  
- 5:00 pm  7:00 pm  CONTRACTOR SOCIAL HOUR AND DINNER BUFFET

**Saturday, July 12**
- 7:00 am  8:00 am  BREAKFAST  
- 8:00 am  Noon  Continuing Education Classes and CWWCA Membership Meeting
Contractors Pollution Liability vs. Limited Pollution Liability
Knowing the difference and choosing the policy that is right for you.

As the name implies, a Contractors Pollution Liability (CPL) policy is normally reserved for contractors who work at job sites and, through the course of their activities, may cause a pollution event. It is important to keep in mind that most CPL policies only insure a contractor at a job site and not at a site that is owned, rented or occupied by the insured. The types of contractors that have a pollution exposure can vary greatly. You do not have to be an environmental contractor to have a pollution exposure.

Another common way to cover a pollution exposure is known as a Limited Pollution Liability (LPL) endorsement. Typically, an LPL endorsement is purchased by very small contractors who can not afford or justify the higher CPL limits and premiums. The LPL endorsement is not a separate policy but rather a part of the General Liability policy. The LPL endorsement generally has much lower limits than you would find through a CPL policy, does not include clean-up or testing or products and completed operations, and may only cover claims within 21 days of a pollution incident.

Providing you a quote for a pollution policy is a simple task. There is one application that needs to be completed to assess your exposure. Additional information needed may be: resumes of principals and key employees, copies of certificates of training—especially in the areas of moisture, asbestos, and lead abatement (if needed), copies of any contracts you might use with subcontractors or your customers, and a copy of your most recent income statement.

Job or project specific pollution policies are also available, and would require the same information to obtain a quote.

Call us for your free pollution exposure review and quote, 970-223-1804.

Please visit our website at www.pc.volkbell.com.
SHAWN BEIRIGER I am a freshman at Western Colorado University. This year I have adjusted to being away from home and family and have furthered my education in the classroom and as a member of a community. My education goals have not changed; I am enrolled in pre-med courses. I am also competing as a Division II athlete. I feel my success in the classroom or on the mat will depend on my dedication and hard work.

DYLAN DEMOSTHENES DIONIS I am a sophomore studying Environmental Science at University of Colorado Boulder. One of the most important details I have studied is that as nations expand and populations grow the need for proper resource management is key. Resource management is particularly important when it comes to water. The money from this scholarship would be used so I could further my education and work toward finding creative and innovative ways to solve the resource problems of our future and help lead America into a new age of abundance and prosperity.

BRAELEN FISHER I would like to take a moment and tell you about my career goals. In the fall of 2014 I will be starting college at Barton County Community College in Great Bend, KS. There I will be enrolled in the Gas Distribution and Transportation Program. I plan to earn my certificate in Gas Measurement. Though my career is not technically in ground water, there are many things that I have learned by helping my grandfather drill water wells that will benefit me in oil and gas industry. One of the major things that I have learned is hard work and discipline. Another is how important our groundwater really is, and what a crucial part it plays in our life.

KYLIE MEERTENS When I graduate from Merino High School in May I plan to attend the University of Wyoming in Laramie, Wyoming. While there I plan to major in Ag Business. I would prefer to work with agricultural finance because I enjoy working with math and numbers. While using my degree in agricultural finance is my first choice, another option that I am considering is agricultural insurance. Obtaining a degree and career in the Ag Business field will not only let my love for agriculture shine through, but my love of math and numbers also.

HANNAH NEWTON Throughout my first two semesters of college at the University of Colorado Denver as a psychology major I have been able to get a look into a few different career possibilities. I am looking into being a counselor for women and children who have been through either abuse or rape situations. I think it would be so rewarding to help someone through such a difficult time in their life. Another career possibility I am looking into is becoming a social worker … which is also good to go through with a psychology major. Wherever my journey through school takes me I know I’ll be prepared. Thank you so much for considering me…. 

TYLER PITCHER My goals for the future are to continue my education at the Colorado School of Mines. My goal is to get degrees in both geological and environmental engineering because I enjoy both of these fields. I am very interested in making the world a better place and I feel that these two fields will help me achieve that goal. The opportunity to potentially save lives is very high with geological and environmental engineering because they both play a role in hazard prevention.

MACKENZIE STEWART I am very thankful to have been awarded the scholarship the past 3 years. My major is History, and my minor is Economics. I am also a Marine Option Midshipman with the Naval ROTC Unit… I will be attending Officer Candidate School in Quantico, VA in July and August. When I am home in Colorado, I will be working on the rig with my dad… Upon completion of my Marine Corps commitment, my goal is to return to Colorado and continue working in the water well industry with our family business. Because of my rigorous academic schedule and increasing ROTC commitments, I have little time for a part time job. The Buck Lively Scholarship was a great help to me the past three years.

EVIE STOKES I plan to attend Cisco Junior College then transfer to either Texas Tech or Abilene Christian University. My anticipated field of study is the healthcare/medical field. I would specifically like to become a pediatrician’s assistant helping children who are ill is my biggest goal for my future career. Then, I would gain enough schooling and experience to advance to a pediatrician’s position and open my own practice and begin my journey to my dream career.

LAURA TEMPLE I am entering Saint Louis University of Madrid as a first year student with the intention of studying medicine. I lived in Spain for 5 months during my junior year of High School and fell in love with the country and culture. I believe that living in Madrid and improving my Spanish will be highly beneficial to my career path. Since there is a growing Hispanic population in the U.S., the need to learn Spanish is increasing in public service fields such as medicine. I am excited to begin working towards my goals: studying medicine, living in Madrid, and receiving the education that I have always dreamed of.

SARAH TEMPLE In college I hope to begin studying medicine and grow the passion that I have for science and biology. Living in Spain my junior year of high school gave me the opportunity to broaden my horizons, so attending college at Saint Louis University in Madrid will gave me the opportunity to continue my global education and Spanish studies. I also wish to do things such as intern and volunteer to further my knowledge and gain experience before I enter medical school. I will be sure that the education provided to me will give me the tools and knowledge necessary to achieve my goal of becoming a doctor and helping people throughout my life.

(Continued on page 8)
LONNY TREHAL Throughout high school I have been involved in football, basketball, matchwitz, student’s council, [and] FCA along with being an active 11 year 4-H member. This fall I plan on starting my college career at Northeastern Junior College where I will begin studying Animal Science as well as participating as a member of the Livestock Judging Team. I hope to earn my Bachelors degree in Animal Science Reproduction. If financially able I would like to then go back for my master’s or apply to vet school and study to be an embryologist. Once I have completed all my school I hope to put my education to work somewhere in agriculture more specifically in the cattle industry. My career depends a lot on what I decide to do after my first 4 years of school. If I do go to vet school, I would practice embryology; if I don’t I would like to either manage a ranch or be a cattle buyer for a feed yard.

SAMANTHA TREHAL Growing up, I was an active 4-h member for 11 years. I enjoyed and learned a great deal from my many projects, but the ones that have made the most impact on my life is livestock judging and showing market and breeding beef. I realized I have a great passion for the agricultural industry as a whole and specifically the beef industry. I would like to become a bovine embryologist, where I can help propel the cattle industry with genetic traits that will improve performance and profitability for those that feed the American people. I have begun my journey to achieving this goal at Northeastern Junior College where I am a freshman. I am a member of the Livestock Judging Team. I am continuing to pursue a degree in Animal Science. I plan to transfer to a University where I will continue my studies towards Veterinary Medicine in order to be able to someday practice embryology.

LADDY TREHAL When I think of where I was a year ago, I am amazed of the many changes that have taken place for me personally. I have always had a passion for the agriculture and beef industry. The one thing that has stayed consistent to me is my goal to achieve a degree in animal science and to have a career in the agriculture industry. I will be graduating from Casper College with an associate’s degree in science. I was a member of the Livestock Judging Team. My second educational goal is to earn a bachelor’s degree in animal science. I will begin working towards this at Colorado State University. I will either focus on animal nutrition or meat sciences. Either way, my long term career goal includes being active in the beef industry to help meet the demands of the consumers.

CODY WESSBECKER I thank you again for giving me the honor of receiving your prestigious scholarship last year and I am grateful that I get the same opportunity again this year. Through my first semester of college I was accepted into the National Society of College Scholars (NSCS). Less than 10% of all college freshmen are accepted into this society so it is quite a privilege. Living on my own and not having a parent to make decisions for me has really given me a new perspective on time management. I also have a greater appreciation for hard work and dedication than I have ever had before. I plan on choosing my major this coming fall and look forward to pursuing a degree, a job and a future. Thank you very much again for this opportunity.
Driller and/or Pump Installer Apprenticeship Program

Colorado Water Well Contractors Association (CWWCA) is a voluntary program for CWWCA members, developed to assist individuals that would like to obtain a water well driller license and/or a pump installation license in the state of Colorado. Records will be kept by the CWWCA and available to the applicant to provide proof of experience to the Board of Examiners (BOE) during the license application process.

Continuing education as it applies to the apprentice program By the end of the each year of apprenticeship the apprentice must attain two continuing education hours. At the end of the apprenticeship, the apprentice must comply with the existing rules for continuing education as set forth in the BOE rules 2 CCR 402-14 concerning continuing education to obtain a drillers and/or pump installers license. A Continuing Education form (similar to the one provided to the licensed contractors by the State during the renewal process each year) will be provided to the apprentice at the end of each calendar year so the CE’s earned can be documented.

For full information on this and other CWWCA educational opportunities; Go to CWWCA.org and look under education.

Products:
- Well Caps
- Well Seals
- Pressure Switches
- Pitless Adapters
- Pitless Units

In The Great State Of Colorado, Experienced Drilling And Pump Contractors Know That Western Hydro Is The Place To Go For The Equipment And Supplies You Want At Competitive Prices!

Franklin Electric

NEW!
WE ARE PROUD TO NOW OFFER A FULL LINE OF FRANKLIN ELECTRIC PUMPS AND MOTORS TO OUR CUSTOMERS!

Please Contact Your Local Western Hydro Corporation Salesperson For More Details!

WE ALSO STOCK A COMPREHENSIVE LINE OF ...  
- Xylem Goulds/Red Jacket Pumps
- Pentair STA-RITE/ Berkeley/Myers Pumps
- Casing - PVC/Steel ● Screen - PVC/Steel Pipe ● Tanks
- Drilling Rig Pumps and Parts ● Drilling Fluids - Mud/Grout
- Water Treatment Systems & Supplies ● Pump Derricks & Parts
- Drilling Supplies - Bits/Subs/Hammers
- Lead Free Water Service Valves ● And Much More!

Western Hydro Corporation now has five complete build centers, strategically located for your build to order submersible and lineshaft turbines. Machine work, labor, and other services available by quotation.

Labor: ● Bowl tear down and rebuild ● Remove seized nipples
- Special TPL’s ● Impeller back filing ● Tube and shaft clean up
- Hardened sleeves removed/installed
- Line shaft/head shaft flame straightening

Machine Work:
- Wear Rings – Cast iron, brass, stainless steel ● Reface Bowls
- Impellers Trimmed ● Motor or drive clutch bored, bushed, re-key
- Machine bowls for wear rings or oversize bearing
- Keyways cut ● Machine for dual seals
- Special length shafts, oil tubes, column pipe, column nipples
- Special Adaptations – Threading, tee-brgs, stretch bearings

Moderator for July 2014 Meeting:
Fred Baros

DWR Report
The BOE has updated Board of Examiners (BOE) policy 2000-4 regarding gravel pit wells and pond wells with new BOE Policy No. 2014-1. The practical effect of the change is that a BOE variance will no longer be needed to install a pump in a gravel pit well or pond well to withdraw ground water for beneficial use. In addition, the BOE will no longer require separate BOE approval for use of water from a gravel pit well or pond for human consumption. A DWR or Ground Water Commission well permit will still be required for such a structure. BOE Policy No. 2014-1 is attached below.

Well Inspection Program
On behalf of the CWWCA, Joe Meigs and Fred Baros have been in touch with Senator Cheri Jahn’s office regarding funding for the State’s well inspection program. Senator Jahn’s office indicated to Mr. Meigs that funding for the program was already available through the General Fund and action was needed by the Joint Budget Committee. Mr. Meigs has reached out to Deputy State Engineer Scott Cuthbertson regarding status of well inspector funding, but has not received a response (we understand that Mr. Cuthbertson is on an extended absence).

Matt Sares reported that the number of well permit applications has not substantially increased and, as a result, the permit fee funding of the well inspection program has not allowed for additional well inspectors.

Water Well Construction Rules
The Water Well Construction Rules (the Rules) will be up for review in 2015. The CWWCA has provided a letter dated January 28, 2014 that identifies annular seal, inspection, licensing requirement and disinfection as areas of the Rules that warrant review. The DWR requested additional specificity regarding recommended Rules changes from the CWWCA and the CWWCA planned to take up the issue through the CWWCA Water Well Construction Rules Review Committee. DWR staff has prepared and provided to the BOE a list of additional topics and proposals for rule changes that have been suggested.

The DWR indicated that there will very likely be changes to the Rules, at a minimum including wording changes to clarify and simplify rules. Substantive Rule changes will be based upon protection of health and public safety and/or protection of ground water resources.

There was discussion regarding Rule 10.1.1 of the Water Well Construction Rules that requires: “If site specific conditions indicate that adherence to the minimum standards will not ensure the adequate integrity of the well and protect the aquifer, the contractor shall be responsible for constructing the well using standards that are more stringent than the minimum specified in these Rules. If conditions on the well permit specify standards that exceed the minimum standards of these Rules, the well construction contractor shall comply with the conditions specified on the well permit.”

There was discussion regarding specific problems that may result from wells constructed to the minimum standards provided in the Rules, including (1) inability to properly abandon wells with stuck pumping equipment, (2) poor water quality following September floods in mountain wells that may be due to grouting and (3) problems servicing wells.

There was discussion regarding: (1) whether the Rules should be based upon best practices, (2) well design life, (3) different minimum standards for different aquifer types (e.g. fractured rock vs. sedimentary rock vs. unconsolidated, (4) minimum annular space, (5) minimum casing size, (6) minimum spacing of centralizers and (7) criteria for a successful well.

Future Topics
DWR report
Well construction rules
Well inspection program

Respectfully submitted by Daniel O. Niemela

MIX MASTER

The Safe Reliable Way to Disinfect Potable Water

- Water exits top of tank through stainless steel reinforced water connection.

- .8 baffle factor * means fewer tanks to maintain 4 log treatment standards.

- New Baffle design ensures uniform mixing and exceeds health agency contact time standards.

- Heavy Duty clench ring to stainless steel clips joins upper and lower water chambers.

- Holes in lower water chamber allow partially mixed water to enter outer chamber.

- Available in two sizes, 80 and 120 gallons

* Testing by Water Quality Association
